

Product Data Sheet

Vandal-Resistant Audio Entry

The CMS range of audio entry products from the CDVI Group offers an extremely simple and cost-effective, vandal resistant solution for most audio entry requirements.

The CMS range is available up to a large multi-way system, and supplied in a stainless steel flush or surface housing. Up to 3 entrances can be controlled, with additional handsets being available for the recipient of the call.

The system works at 12Vdc, so there is the option to replace the standard power supply (which comes complete with built-in relay and timer for lock release) with a metal cased power supply with battery charger to back up the system during periods of mains failure. All models are suitable for the option of integral keypad or proximity unit in the door station(s).

Technical specification

Power Supply

- 12Vdc system complete
- Standard 12Vdc, 1.5A psu included
- 0-30 second timed changeover relay
- 92 x 142 x 60mm (h x w x d)
