

Product Data Sheet

DDA Special Exit Devices

Our range of special exit devices provide a more specialised method for releasing an electronic lock. In line with the Disability Discrimination Act 1995, and to satisfy most Fire Officer requirements, these devices are particularly effective where the minimum effort or concentration is needed to activate the exit procedure. The 'CM' range are all active switches with a large target area - all can be connected to our 'TST' touch sensitive circuit to provide ideal exit functions for infirm or disabled persons.

CM-25/4

CM-41/4

CM-40/4

CM-49

CM-60/3

CM-63-BL

CM-40/4 + CM49

Model

NRAWCM-25/1
