

Product Data Sheet

Door Loops & Key Switches

Our range of door loops are offered to suit all applications and budgets. All of our loops are surface mount, with the exception of the NRAWCDL which provides a neat and more secure solution to transferring cables from a frame to a door/gate leaf.

Our key switches offer a secure means of overriding an electronic locking device. We have many models available all of which can be supplied key'd to differ or key'd alike as required. The Euro Cylinder models are supplied as standard without a Euro cylinder but can be supplied with cylinders if required key'd to differ, key'd alike and also master suited.

Keyswitch Model Numbers - All Stainless Steel
