

RTE-SS DOMES

Heavy duty dome exit switches

Range: RTE

The RTE-SS-SSD & SFD range offers heavy duty exit switches with the added advantage of being housed in high quality stainless steel.

As well as being a convenient exit switch, suitable for heavy traffic, the unit is ideal for applications where the users are not dexterous and have difficulty "targetting" a small push button - especially suitable for applications which need to be compliant with the DDA.

"DOOR RELEASE" is standard text, we do offer alternative text and/or logo, please consult our sales department for information.

The RTE-SS is available as flush (-SFD) or surface (-SSD), both being housed in high grade stainless steel - and supplied with the applicable back box, security screws, allen key and instructions.

H.R.V.

- High traffic areas
- Vandal resistant
- High impact dpome switch
