

Product Data Sheet

Esko 550 Multi Purpose Rim Lock

When you need to secure premises quickly and efficiently the ESKO 550 comes into its own. With a massive 50mm bolt throw on either side of lock case it is also "non-handed". Each throw of the key engages a deadlock pin so that if any force is used against the bolt the deadlock pin will take the force rather than the cylinder pins. There is also a snib which overrides key action on both sides of the cylinder.

The external cylinder is 50mm long and is circular which is a great advantage for quick fitting, one circular drilled hole is all that's needed.

To further assist with the installation of this product, Nigel Rose (MS) Ltd have had a non-handed mounting bracket manufactured as an optional extra. These brackets can be used when it is impossible to get a fix - for example in the bottom corners of 'Up & Over' garage doors.

The Esko550 is available both Keyed to Differ **Model # ESKO550**
or Keyed Alike **Model # ESKO550KA**

Dimensions:

Cylinder - 50 x 25mm
Mounting Bracket - 103W x 75mmH
