

# Glutz

**Typical damage  
caused when a  
double swing door is  
forced**

## **Pivot Point Protector**

Designed to repair existing damage or protect against damage at the pivot point on all timber doors

Proven to extend the life of a pivoting door  
Quick and easy to fit saving time and money  
Reduces maintenance and the need to replace damaged doors

Satin stainless steel as standard  
Suitable for corrosive atmospheres,  
Also available in polished stainless steel,  
brass and RAL coloured coated  
finishes.

Made to measure – suitable for  
all sizes of pivoting timber doors  
Made in the UK

Pivot Point Protector represents excellent value for money when compared with the possible cost of replacing doors that can typically cost over £650  
UK patent pending
