

Product Data Sheet

FAMAG[®] 'BORMAX[®]' Wood Bit Cutter

Ideal for creating circular mortise holes (for tubular latches) and tenon joints or for removing knots in wood, the FAMAG[®] 'Bormax[®]' forstner bit is suitable for cutting both hardwoods and softwoods. Unlike cheaper cutters, the centre is precision machined for a true diameter. The waveform design of Bormax[®] style bits provide a faster, cleaner cut and the side channels reduce the area of the bit contacting the wood creating less friction and heat build up leading to much longer tool life. Razor sharp teeth cut cleanly into the wood leaving a perfect flat bottomed hole. Precision machined for a perfect diameter.

Made in Germany from Alloyed tool steel.

The FAMAG[®] Bormax[®] Forstner bit has a diameter of 23mm, cutting depth of 85mm, an overall length of 135mm and a 13mm diameter shank.
